Introduction

As labour and mechanisation works hand in hand in enhancing the productivity of the oil palm industry, the Malaysian Palm Oil Board (MPOB) is now organising a seminar on Labour and Mechanisation in Plantations (LAMP) 2022. This seminar will address issues on the current labour situation and utilisation of mechanisation in the oil palm plantation sector in Malaysia. This seminar is one of MPOB efforts to reduce dependency on foreign labour and to increase worker's productivity through mechanisation.

The Malaysian oil palm plantation sector is currently experiencing a shortage of skilled and unskilled labour as locals are not keen to work in the estates and hence are heavily dependent on foreign workers. Mechanisation is touted as a faster way to address this issue and with the help of agricultural technology, the nature of work in the plantations can be more conducive for locals to join the plantation sector. Hence, this years' seminar focuses on the theme, 'Boosting Mechanisation in Addressing the Labour Issues'.

LAMP Seminar 2022 provides a platform for the industry to share information and views on the current labour and mechanisation issues, bring out new ideas, formulate strategies, open up investment opportunities and adopt new technologies for the sustainability and competitiveness of the Malaysian oil palm industry. Besides that, this seminar will also enhance the networking activities among industry members.

Objectives

- Disseminate and share information on the policies, current scenario, issues and challenges on labour utilisation in the oil palm plantation sector in Malaysia.
- Share knowledge and experiences for the betterment of the oil palm industry.
- Expose participant to the latest technologies.
- Promote the adoption of technologies and machineries in plantations.
- Disseminate information on investment opportunities and incentive schemes.
- Identify R&D needs and priorities in plantations.
